CMS

```
33 export async function updateTestimonialAction(  
45   // return { success: true, data: mockTestimonialStore[testimonialIndex] };  
46  
47   const mockUpdatedTestimonial: TestimonialItem = {  
48     id: testimonialId,  
49     author: updates.author,  
50     quote: updates.quote,  
51     createdAt: new Date(), // Or fetch existing createdAt if only updating  
52   };  
53   return { success: true, data: mockUpdatedTestimonial };  
54 }  
55  
56 export async function deleteTestimonialAction(testimonialId: string): Promise<ServerActionResponse> {  
57   console.log('Server Action: deleteTestimonialAction for ID', testimonialId);  
58   await new Promise(resolve => setTimeout(resolve, 50)); // Reduced delay  
59  
60   // const initialLength = mockTestimonialStore.length;  
61   // mockTestimonialStore = mockTestimonialStore.filter(t => t.id !== testimonialId);  
62   // if (mockTestimonialStore.length === initialLength) {  
63   //   return { success: false, error: "Testimonial not found." };  
64   // }  
65  
66   console.log('Server Action: testimonial deletion successful for', testimonialId);  
67   return { success: true };  
68 }  
69  
70
```

membuat autentikasi items testimonials agar langsung terintegrasi dengan frontend
