```
47 // return { success: false, error: "Image not found or not authorized." };
48 // }
49 // mockImageStore[imageIndex] = {
50 //   ...mockImageStore[imageIndex],
51 //   ...updates,
52 //   uploadedAt: new Date(mockImageStore[imageIndex].uploadedAt)
53 // };
54 // return { success: true, data: mockImageStore[imageIndex] };
55
56 // Mock update
57 const mockUpdatedImage: ImageItem = {
58   id: imageId,
59   name: updates.name || `Image ${imageId.substring(0,4)}`,
60   dataUri: 'https://placeholder.co/600x400.png', // This would be fetched from the existing item
61   price: updates.price !== undefined ? updates.price : "Not set", // Handle price update
62   uploadedAt: new Date() // Or fetch existing uploadedAt
63 };
64 return { success: true, data: mockUpdatedImage };
65 }
66
67 export async function deleteImageAction(imageId: string): Promise<ServerActionResponse> {
68   console.log('Server Action: deleteImageAction for ID', imageId);
69   await new Promise(resolve => setTimeout(resolve, 50)); // Reduced delay
70
71   // const initialLength = mockImageStore.length;
72   // mockImageStore = mockImageStore.filter(img => img.id !== imageId);
```

membuat autentikasi images.ts untuk menginput sebuah gambar produk agar tersimpan di local dan server
