CMS

```
cms > src > app > actions > TS news.ts > ...
32 export async function updateNewsItemAction(
33   // ...
34   // mockNewsStore[newsItemId] = {
35   //   ...mockNewsStore[newsItemId],
36   //   ...updates,
37   //   publishedAt: new Date(mockNewsStore[newsItemId].publishedAt) // Preserve original publish date or update if part of 'updates'
38   // };
39   // return { success: true, data: mockNewsStore[newsItemId] };
40   const mockUpdatedNewsItem: NewsItem = {
41     id: newsItemId,
42     title: updates.title || `Title ${newsItemId.substring(0,4)}`,
43     content: updates.content || `Content ${newsItemId.substring(0,4)}`,
44     author: updates.author || 'Author',
45     category: updates.category || 'General',
46     imageUrl: updates.imageUrl,
47     publishedAt: new Date(), // Or fetch existing publishedAt
48   };
49   return { success: true, data: mockUpdatedNewsItem };
50 }
51
52 export async function deleteNewsItemAction(newsItemId: string): Promise<ServerActionResponse> {
53   console.log('Server Action: deleteNewsItemAction for ID', newsItemId);
54   await new Promise(resolve => setTimeout(resolve, 50));
55
56   // const initialLength = mockNewsStore.length;
57   // mockNewsStore = mockNewsStore.filter(n => n.id !== newsItemId);
58   // if (mockNewsStore.length === initialLength) {
59     // ...
60   }
```

membuat autentikasi news.ts agar bisa terintegrasi dengan crud nya yang langsung terhubung dengan baik
