CMS

```
src > components > ⚙️ theme-provider.tsx > ...
1
2 "use client"
3
4 import * as React from "react"
5 import { ThemeProvider as NextThemesProvider } from "next-themes"
6 import type { ThemeProviderProps } from "next-themes/dist/types"
7
8 export function ThemeProvider({ children, ...props }: ThemeProviderProps) {
9   // Removed the isClient check to allow next-themes to manage FOUC
10  return <NextThemesProvider {...props}>{children}</NextThemesProvider>
11 }
12 |
```

Membuat **komponen pembungkus** untuk warna tema terang/gelap

Outputnya jadi begini
